

New report calls to replace CEOs with AI to Reduce Water Usage

Posted by u/Ok-Feeling-1743 • 0 points • 3 comments

A new report shows Microsoft's water usage jumped 30% from 2021 to 2022, highlighting the environmental impact of the emerging AI industry. [One study] (<https://arxiv.org/abs/2304.03271>) found that chatting with ChatGPT for a bit uses half a liter of water. ([Source](<https://gizmodo.com/ai-this-week-time-to-replace-your-ceo-with-ai-1850826288>))

****The Tech Industry's Water Problem****

- * ***Data Centers Need Cooling*****: Data centers require huge amounts of water for cooling to operate properly, much of which is pumped from local supplies.
- * ***AI is Extremely Thirsty*****: AI systems like ChatGPT have far higher energy densities than normal servers, needing more power and thus more cooling and water.

****Microsoft's Increased Water Usage****

- * ***30% Increase*****: Microsoft's latest environmental report showed its water usage rose sharply by 30% from 2021 to 2022 as its AI operations accelerated.
- * ***Estimating GPT-3's Usage*****: A recent study projected it took around 700,000 liters just to train GPT-3 over a two week period, described as "extremely concerning."

****The Difficulty of Oversight****

- * ***Lack of Transparency*****: Most AI vendors don't release water usage data publicly, making oversight of their environmental impact difficult.
- * ***Few Options to Reduce Usage*****: There are ways to reduce the water needed for AI systems, but little evidence companies are widely adopting them.

****TL;DR:**** Microsoft's rising water consumption highlights the enormous, potentially unsustainable thirst that the expanding AI industry generates, raising environmental concerns. More transparency and mitigation efforts may be needed.

The title is misleading and the body never says anything about replacing CEOs

Welcome to the r/ArtificialIntelligence gateway

News Posting Guidelines

Please use the following guidelines in current and future posts:

- * Post must be greater than 100 characters - the more detail, the better.
- * Use a direct link to the news article, blog, etc
- * Provide details regarding your connection with the blog / news source
- * Include a description about what the news/article is about. It will drive more people to your blog
- * Note that AI generated news content is all over the place. If you want to stand out, you need to engage the audience

Thanks - please let mods know if you have any questions / comments / etc
