How much electricity does AI generation consume?

Posted by u/SexDefendersUnited • • 0 points • 25 comments

I keep hearing people say that AI generation costs a ton of electricity to run as a criticism. Is that actually true or are people just picking at straws? I thought it can't be that bad if you can do it on a regular system. Or are people confusing it with crypto for some reason? Because that does cost a ton of power.
