

AI's Thirst: Tech Giants' Rising Water Use

Posted by u/clonefitreal • 0 points • 2 comments

- * Microsoft, Google, and Meta face scrutiny for increasing AI-related water use.
- * AI could necessitate 6.6bn cubic meters of water by 2027, stressing global resources.
- * Increases in water usage: 34% (Microsoft), 22% (Google), and 3% (Meta) in 2022.
- * Goals to replenish aquifers by 2030 highlight a commitment to water sustainability.
- * An AI data center's consumption of 6% of local water underscores community effects.
- * The water footprint of ChatGPT operations points to the environmental cost of AI's computational demands.

Yet another angle at which Authorities are trying to take control over AI.

You should be fighting back against the authorities, this is not a legitimate environmental concern.

u/Realistic_Cry111 • 1 points • 2024-02-27 17:27 UTC

Does the use of water involve evaporation? Isn't "evaporation" part of nature's water cycle, followed by "precipitation"? Hmmm 🤔

News Posting Guidelines

Please use the following guidelines in current and future posts:

- * Post must be greater than 100 characters - the more detail, the better.
- * Use a direct link to the news article, blog, etc
- * Provide details regarding your connection with the blog / news source
- * Include a description about what the news/article is about. It will drive more people to your blog
- * Note that AI generated news content is all over the place. If you want to stand out, you need to engage the audience

Thanks - please let mods know if you have any questions / comments / etc
