AI Computing Is on Pace to Consume More Energy Than India

Posted by u/FarPercentage6591 • • 0 points • 0 comments

I know how much you folks like infographics that show us scale of current AI-boom and I like it too.

Below is an estimate of the amount of **energy burned by H100 GPUs sold in 2023**. This amount of energy is **enough to power ~4 million people** (Georgia population)

[https://preview.redd.it/9m5m14mk37vc1.png?](https://preview.redd.it/9m5m14mk37vc1.png?width=2154&format=png&auto=webp&s=174139c50e6f1bca76c737e3e62f5e0a31a8fd50)

[width=2154&format=png&auto=webp&s=174139c50e6f1bca76c737e3e62f5e0a31a8fd50](https://preview.redd.it/9m5m14mk37vc1.png?width=2154&format=png&auto=webp&s=174139c50e6f1bca76c737e3e62f5e0a31a8fd50)

And [yesterday ARM CEO Rene Haas said](<https://www.bloomberg.com/news/articles/2024-04-17/ai-computing-is-on-pace-to-consume-more-energy-than-india-arm-says>) that "by 2030, the world's data centers are on course to use **more electricity than India**", the world's most populous country".

Wow! Is the contribution to the global economy of AI computing comparable to that of 1.5 billion people?
