

AI energy draw from Chicago datacenters to rise ninefold - A global problem

Posted by u/Rare_Adhesiveness518 • • 0 points • 3 comments

US energy provider Exelon has calculated that power demand from datacenters in the Chicago area is set to increase ninefold, in more evidence that [AI adoption is putting further strain on electricity supplies](https://www.theregister.com/2024/04/19/ai_set_to_drive_up/).

If you want to stay ahead of the curve in AI and tech, [look here first](https://smmry.tech/?utm_source=reddit).

****Key findings:****

- * This surge is fueled by a wave of planned data center projects, estimated to require a whopping 5 GW of power – a significant strain on the current grid.
- * This rise in data center energy consumption puts immense pressure on existing electricity supplies.
- * The rise in data center energy use puts strain on electricity grids and may lead to exploring alternative energy sources like nuclear.
- * This trend isn't unique to Chicago. AI's growing thirst for power is a global concern, raising questions about its environmental impact on energy consumption.
