# **The ABCs of AI and Environmental Misinformation: DeSmog talks with AI researchers about the risks of widespread fake climate content and how to combat it.**

Posted by u/WholsJolyonWest • • 0 points • 0 comments

In another recent study published this month, researchers found GPT-fabricated content in Google Scholar mimicking legitimate scientific papers on issues including the environment, health, and computing. The researchers warn of “evidence hacking,” the “strategic and coordinated malicious manipulation of society’s evidence base,” which Google Scholar can be susceptible to.
