

AI will use a lot of energy, and that's good for the climate.

Posted by u/bengineer19 • • 0 points • 35 comments

If you asked me how to scale clean energy, I would prescribe a magical source of urgent energy demand.

Someone willing to pay a premium to build solar+batteries, geothermal, and nuclear, in order to bring them down the cost curve and make them cheaper for everyone.

That is exactly what AI data centres are.

That's good point! If AI pushes more investment in clean energy it could really help make it cheaper and more widespread!!

u/yoyododomof • 2 points • 2024-10-05 16:50 UTC

I hope this is a troll post. Your theory sure didn't work with bitcoin. Burning all of the fossil fuels faster isn't what will obviously happen. You are naive and stupid if you think otherwise.

u/Theistus • 1 points • 2024-10-05 16:47 UTC

How'd that work for crypto?

u/BigMagnut • 1 points • 2024-10-05 16:41 UTC

AI will help create technology to become more efficient, saving the climate.

u/Theistus • 1 points • 2024-10-05 16:53 UTC

Step 1, collect underpants...

u/ProfessorHeronarty • 0 points • 2024-10-05 16:39 UTC

And yet again some naive AI post that fundamentally ignores that all this shit is developed as a product and follows capitalist logic.

u/BigMagnut • 1 points • 2024-10-05 16:42 UTC

Ants and bacteria follow capitalist logic.

u/yoyododomof • 1 points • 2024-10-05 16:47 UTC

Evolutionary logic is not free market capitalist logic.

u/BigMagnut • 2 points • 2024-10-05 16:59 UTC

But it's still market logic.

u/ProfessorHeronarty • 0 points • 2024-10-05 17:04 UTC

No it's not. This is a whole different giant debate: Why do certain people constantly push for describing markets and capitalism (both are not the same BTW) as natural phenomenons when they are social institutions made by men.

Your comments go in that direction although it's never quite clear with fancy one liners

u/BigMagnut • 0 points • 2024-10-05 17:33 UTC

They are natural. Bacteria, insects, all sorts of creatures trade. The relationship between cleaner fish and their clients is a good example of this. Cleaner fish are paid in food to clean their clients bodies in the ocean.

[https://en.wikipedia.org/wiki/Cleaner_fish]
(https://en.wikipedia.org/wiki/Cleaner_fish)

Capitalism I agree is man made. Markets are not man made and are older than humanity.

u/ProfessorHeronarty • 1 points • 2024-10-05 19:35 UTC

And now we dabble in language. Call it trade or pay or even market. That's not the same as humans do and the context were talking about. So I'm not sure what you wanna contribute to the conversation here

I don't see any difference. Just like I don't see a difference between computation a human brain does, and computation a physical system does.

u/MrLunk • 1 points • 2024-10-05 16:39 UTC
Troll-post alert.
