

Ai Power Consumption

Posted by u/FlashyPotatoes • 0 points • 5 comments

How come no one talks about or discusses the mass amount of power it takes for ai to run? When people were just goofing off with Dall-e or whatever; each prompt alone uses as much power as charging your phone. Wouldn't higher scale and more refined forms of ai be using just as much or more power?

It is being discussed. Several firms have been pushing for SMRs (small modular reactors) to provide power. Bill Gates via TerraPower is building his own in WY.

I feel like a lot of people are talking about that? It's like the third thing that is brought up when talking about AI, right after how shitty it is and how it's stealing from artists/authors.

u/FlashyPotatoes • 1 points • 2024-11-06 21:52 UTC

I definitely feel like the odd one out now 😂 but I'm very glad to feel this way because I feel like it's super important as well as stealing from creators. :/

u/YourTimelsOver127 • 2 points • 2024-11-06 21:50 UTC

People are always talking about that

u/FlashyPotatoes • 1 points • 2024-11-06 21:51 UTC

I never see or hear about it. I'm glad it is being discussed.

u/notextinctyet • 3 points • 2024-11-06 21:49 UTC

People talk about that constantly. It's all over any discussion of AI ethics here and IRL. I work in non-AI computing and still hear about it all the time. You're talking about it right now.

u/FlashyPotatoes • 1 points • 2024-11-06 21:51 UTC

Oh, well I'm glad it is being discussed. I was shocked that I only just recently learned about it, less than 3 months ago.

u/notextinctyet • 3 points • 2024-11-06 21:51 UTC

It's a pretty new problem, given that AI itself is very young.

Also: I believe there are a lot of machines where water is used as the coolant as well, how much water and energy is being wasted so people can make shitty ai stuff?

u/YourTimelsOver127 • 1 points • 2024-11-06 21:57 UTC

The water is reused... it passes through a cooler that lowers the temperature of it before entering the system again

u/FlashyPotatoes • 1 points • 2024-11-06 22:00 UTC

Okay, that's good to know, thank you :)
