

Is the same amount of energy used whenever you make a google search vs AI?

Posted by u/Any_Arrival_4479 • 0 points • 10 comments

So I learned recently that asking AI, like ChatGBT, uses as much energy as like 500 google searches. But everytime I use Google it gives an AI response.

Googles AI is pretty bad, so it probably uses less energy, but does it still take a lot more energy when looking something up then it did before the AI? Or is Googles AI different to other AI, in order to make it work easier with their systems?

You know... *uhm* We might bankrupt the world by asking (free ai) big questions.....
And by me saying this....A lot of other people are already doing this.
So buh bye world....Power to the people once again :)

u/ProRuckus • 2 points • 2025-06-06 21:27 UTC

You are basically right. A normal Google search is super efficient because it just pulls from an index of web pages. Full AI models like ChatGPT take way more energy because they have to process everything through a giant neural network in real time. Google's AI responses (like the ones in search results) are kind of a middle ground. They are designed to be lighter and faster, and some parts are pre-generated, so they do not burn as much energy as something like ChatGPT. But yeah, even adding that to search makes it use more energy than it used to.

is there a way to turn off the autogenerated AI summary at the top of a Google search? I never asked for it and I really don't want it anyway - how do I make it stop?

u/ProRuckus • 1 points • 2025-10-30 18:04 UTC

From a desktop computer, make sure you're signed into your Google account and on Google.com:

1. Click on the "Search Labs" icon on the top right (chemistry beaker symbol)
2. Click the setting icon
3. Turn off the "AI Mode" option

4. Turn off "AI in Search" option as well

u/Routine-Nature-456 • 1 points • 2025-11-01 16:35 UTC

Thank you for the reply. Interestingly, I already have all that toggled off, but the search summary is still happening anyway... weird.

u/ProRuckus • 1 points • 2025-11-01 16:57 UTC

That's odd. 🤖

I only use Aria AI from Opera. ChatGPT is not free.

u/Whodoesntlikeanal • 4 points • 2025-06-06 20:45 UTC

It's water cooled systems, but the real cost is the energy and how we power these systems. We aren't set up yet for this high growth, when it comes to infrastructure for energy. Gemini pro is actually pretty good. Used to be horrible, but it's up to speed. The google ai search header is prob a combo of their normal search summary as well as some machine learning, but at a smaller amount of compute, which can lead to misleading answers.

Also, it's called GPT not GBT.

I misspell that way too often. It's just easier to say B and so I think that's how it's spelled. That's totally on me tho

u/BadAutomations • 1 points • 2025-06-06 20:39 UTC

Chatgpt uses water that could be used to feed kids in Africa

u/SphericalCrawfish • 1 points • 2025-06-06 20:46 UTC

But it won't be used that way so it hardly matters.

u/Any_Arrival_4479 • 0 points • 2025-06-06 20:42 UTC

Did you read my post or just the title?

u/DavidDarnellBrown • 1 points • 2025-06-06 22:11 UTC

I read the book of Mormon

u/MemeEditsReturns • 2 points • 2025-06-06 20:54 UTC

But I did have water this morning??
