Why aren't any companies focusing on green energy development like they are spending money on Ai or self driving?.

Posted by u/Snehith220 • 0 points • 143 comments

Day by day global warming is increasing and with the development of Ai, power consumption has sky rocketed and leading to more problems.

Why aren't any companies and countries supporting or developing tech which will help humans now and which is very much needed.

If they spend even 1/4th of the money spend here on crypto or metaverse or bombs it can create wonders.

Is there no profit if improved tech in renewable resources or is it costly.

Money...companies can make far more from the margins on fossil fuels than they can clean energy...the same goes for returns on AI and super cool driverless cars, like driving is hard

u/SpikedPsychoe • 1 points • 2025-06-28 19:14 UTC

Green energy has subsidies from the government they dump money regardless of outcomes.

The spending is chasing the investors. And investors like cool new shiny things. Better electricity storage is pretty dull, but still a good investment.

u/Apprehensive-Ad9523 • 2 points • 2025-06-27 21:26 UTC

Ask your president.

u/johnjumpsgg • 2 points • 2025-06-27 06:21 UTC

Ha they're actually investing in revamping the grid for AI . So making the grid more efficient and coming up with power sources for AI data centers and robots will probably be an enabler for green . So I guess

if you say battery technology for robots because robots will be doing all of this stuff ... and the batteries and SMR for data centers and ... you might get VC funding because they think Amazon/ Google will be the end customer .

u/simulated_copy • 1 points • 2025-06-27 00:16 UTC

Esg initiatives are dead

u/Apprehensive-Ad9523 • 1 points • 2025-06-27 21:27 UTC

Dead is permanent. Not so here

u/Stooper_Dave • 2 points • 2025-06-26 19:32 UTC

Green energy is a nothing burger when it comes to cash flow. Its a net negative investment. Ai is the new dotcom boom. It makes sense to invest heavily to come out ahead before the inevitable bust.

u/CynicalGodoftheEra • 1 points • 2025-06-26 16:14 UTC

Simply to put, tariffs and doesn't make money as quick as dumping it on Nvidia stock.

u/C_Dragons • 3 points • 2025-06-26 15:38 UTC

Renewables and power storage are under active development. The number of nations whose energy is majority renewable is growing.

u/Apprehensive-Ad9523 • 1 points • 2025-06-27 21:28 UTC

Si si

u/SirWillae • 2 points • 2025-06-26 10:04 UTC

It's all driven by consumers. If consumers demand environmentally friendly products and services, manufacturers will provide them. But I think the average consumer cares more about price than the environment.

u/brinerbear • 1 points • 2025-06-27 12:28 UTC

Exactly. Ultimately it comes down to price and at least for now renewables have not been cheaper but that could change.

u/This_Assignment_8067 • 2 points • 2025-06-26 09:21 UTC

Some companies might be focused on green energy, you just don't hear about it too much. The news generally reports on topics that reel in viewers and generate clicks. That usually involves high profile flashy business undertakings and rapid development. All the stuff that has incremental improvements over a decade is probably considered "boring" and doesn't get reported on.

u/Snehith220 • 1 points • 2025-06-26 09:29 UTC

But the effort over 100 years is not much.

u/Potential_Status_728 • 1 points • 2025-06-26 05:04 UTC

Nobody really cares about the long term health of the planet, it's only the next's quarterly report that CEOs and shareholders care.

u/Snehith220 • 0 points • 2025-06-26 05:18 UTC

Yup. Money 🤑

u/Patereye • 1 points • 2025-06-26 04:54 UTC

I literally just spent the entire week roadmapping new Green tech with a team that costs like \$100,000 a day.

And it was all funded by Southeast Asia.

u/Business_Raisin_541 • 2 points • 2025-06-24 20:58 UTC

Because China is the one who dole out subsidy for Green Tech while the West is the one who keep talking about Green but in the end do not develop green tech

u/CauliflowerTop2464 • 2 points • 2025-06-25 14:32 UTC

Biden doled out a bunch of money only for donOld to scrap the initiatives.

u/Brave_Afternoon2937 • 1 points • 2025-06-26 03:54 UTC

That money got spent, Trump has not clawed back a single dollar of it, it's actually what pissed his base off. The money is earmarked by congress and was spent. The Congress has not cut a single dollard of federal spending since Clinton.
