

"AI art is destroying the environment..." says the person using Reddit?

Posted by u/Striking-Meal-5257 • 0 points • 51 comments

Don't get me wrong, energy consumption is a valid concern, and I hope we make **AI Art models** more efficient, since the technology isn't going away.

But people seem to **selectively nitpick** what bothers them about the broader "energy consumption" issue.

I feel the only people likely to be swayed by the environmental argument are people who care about the environment, who are likely already doing their fair share.

> We don't need 20 people doing zero waste perfectly, we need 7 billion doing it imperfectly. --- Anne-Marie Bonneau

Let's not forget we cut down trees to make pencils and paper for artists.

With the help of AI (specifically Perplexity in this case) I quickly learned that this is a pretty complex issue. 🤖

u/Elegant_Fool • 1 points • 2025-07-02 19:47 UTC

Nah ai art isn't art just my personal view. It doesn't take as much work and time as taken by people who draw traditionally or digitally rather than using ai. And many people draw for the process of drawing as they enjoy it.. using ai just takes out the fun of art. It shouldn't be call art. Maybe something else.

Strawman argument and whataboutism all combined.

I am impressed.

u/Pretend_Jacket1629 • 3 points • 2025-07-02 17:23 UTC

remember kids, even a single minute saved by using an ai generation instead of using photoshop is less energy spent

AI datacenters are destroying the grid frequencies- i live close to one and it's literally never 60 Hz when i measure

u/johnybgoat • 1 points • 2025-07-02 16:00 UTC

They're like a bull when someone is waving something in front of them. They only see red.

In our context they're completely ignoring things like... AI cut down hours long Google research and editing significantly. Also cuts the need to look up web one by one hoping to find something you need. All of which calls out to different servers, which uses energy, and the fact you need more time on the device already means youre burning way more energy. Willful ignorance is what it is

u/FashoA • 2 points • 2025-07-02 15:46 UTC

If we don't use AI it means all the learning footprint will go to waste.

u/TransitionSelect1614 • 1 points • 2025-07-02 17:32 UTC

Literally all the training data gone to waste
