Environmental impact of generative AI and the awareness of digital designers

Posted by u/cisfer • • 0 points • 0 comments

If you are a creative individual working in the digital design area who uses AI for image generation as part of your work I would love to count on your participation. I am conducting a research project as part of my MBA study and I am missing only 10 answers to my research questionnaire.

The questionnaire is available in this link and it takes less than 5 minutes.
