

How do aibros justify the environmental implications of AI and the fact that it steals artist and gives companies an excuse not to pay said artist?

Posted by u/III-Foot-2549 • 0 points • 33 comments

I'm genuinely asking because I've seen schizo takes from the aibros saying artist are "lazy elitist gatekeeping art" which is stupid

Comments

u/Bitter-Hat-4736 • 1 points • 2025-08-04 00:21 UTC Is every non-consensual use of artwork "stealing"?	
u/DaylightDarkle • 1 points • 2025-08-04 00:41 UTC Hey, random thought. Just came to me. Did you know that sending people to another subreddit by a request such as "Can people who are more knowledgeable and have more time respond to some of the arguments under my recent aiwars post" is considered brigading and explicitly against reddit rules? Funny, that. Don't know why that came to me.	u/Bitter-Hat-4736 • 1 points • 2025-08-04 00:42 UTC What if I was already on both subreddits before said post was posted?
	u/DaylightDarkle • 1 points • 2025-08-04 00:44 UTC Good point. I assume if that was the case, the person who did that would definitely not make a comment "I just made a comment," in the submission directing them here within a minute That would be super silly to make it that obvious
	u/Bitter-Hat-4736 • 1 points • 2025-08-04 00:46 UTC I think it matters which came first. Maybe I found their post requesting help after I made my comment, that would be rather interesting, wouldn't it?
	u/DaylightDarkle • 1 points • 2025-08-04 00:51 UTC That's quite the contrivance for a period of 38 seconds.
	u/Bitter-Hat-4736 • 1 points • 2025-08-04 00:54 UTC How is it contrived?
	u/DaylightDarkle • 1 points • 2025-08-04 00:57 UTC The order of events doesn't line up in a way that would be natural.

u/Kosmosu • 2 points • 2025-08-03 22:59 UTC

Should I bother showing you my local model that runs off my GPU? or would you even understand how little generative LLM's and stable diffusion actually utilize?

Where the fuck was this environmental craze when Crypto farming was all the rage? Didn't impact you so you didn't care that GPU farm's too significantly more energy than current AI models and usages.

u/III-Foot-2549 • 1 points • 2025-08-03 23:59 UTC

Lmao wtf, why are you talking about crypto loll, I dont like crypto either due to It just being stupid

u/Kosmosu • 1 points • 2025-08-04 00:11 UTC

I see you completely missed the point.

Let me spell it out for you since antis likes to live in their own reality.

Crypto... is far more harmful to the environment than AI as it consumed far more resources than AI. Where was the outrage then?

Where was this sudden love for the enviornment?

Or the chip factory that makes your tablet that you draw on?

Or the AC unit that your probably sitting in your comphy home with consumes more energy and water usage than a single server blade? Where is your environmental concerns then?

Let's be real. People only make the environmental argument because its the latest trend. You only care because AI is going to take your job. So now its suddenly important.

u/Lightninghyped • 3 points • 2025-08-03 21:16 UTC

Maybe cause it is a different artwork and definitely 20sec iteration that works on my GPU uses much less electricity than 20 minutes of 'artists' on their devices?

u/No-Opportunity5353 • 1 points • 2025-08-03 20:07 UTC

Get a job, anti.

u/jfcarr • 1 points • 2025-08-03 20:01 UTC

"Send from my iPhone"?

u/Drakahn_Stark • 5 points • 2025-08-03 19:30 UTC

The environmental stuff has been twisted, AI is not the majority of datacentres, the majority would be doing things like hosting reddit or storing private information that corporations have collected about you., so if you are fine with reddit/steam/youtube/spotify/etc existing, it is odd to be against a new tech that uses less than those.

You typing this post used more water and electricity than AI making a bunch of writing and images.

Since AI does the job many many times faster than a human, it uses less energy to get the same job done.

It's also worth noting, it is a technology that is helping us find new ways to reduce carbon emissions.
