

Will the people who criticize AI on environmental grounds care about ChatGPT's new open source models you can run on your own computer rather than from a data center?

Posted by u/jaqueslouisbyrne • 0 points • 4 comments

You might assume that they'd be jumping for joy right now. These are super high quality models, and the 20b version can run on a Mac with 16GB of RAM. That means no data center using whatever insane amount of water they cite. This is a big win for them, right?

Realistically, they'll probably just move on to something else to be upset about.

I wonder if you realize how useless a local LLM is for almost everything that LLMs are actually useful for.

u/MPforNarnia • 1 points • 2025-08-06 04:41 UTC

I'd assume data centres are much more efficient than the equivalent computing power on many individual laptops.

Ran it on my Mac... it... was not fast lmao.

u/jaqueslouisbyrne • 1 points • 2025-08-06 04:20 UTC

You can improve the performance with some finagling. For example, I made a new account on my Mac to cut down on apps using up memory in the background, which was key.
