How AI infrastructure is driving a sharp rise in electricity bills

Posted by u/lire_avec_plaisir • 0 points • 1 comments

5 Sep 2025 - *transcript and video at link*- Electricity bills are climbing nationwide, rising faster than inflation in many places. The explosive growth of AI and the massive data centers behind it are driving demand and straining the grid. To explain how this hits consumers, and what can be done, Geoff Bennett spoke with Ari Peskoe, director of the Electricity Law Initiative at Harvard Law School.
