Me using ChatGPT for my own amusement is worth it until every country starts to care about our environment.

Posted by u/RestlessPics • • 0 points • 2 comments

We the people can do little to nothing to protect our environment. The corporations, governments, and other factors out of our control, are the problem. Until the entire world comes together and makes a stand, I will keep on using AI for my own amusement. I'm here for little time compared to the universe. I'm here to enjoy it.
