

yes AI isn't the only water Sinner but among the Water Sinners AI is the worst one

Posted by u/Substantial-Box4946 • 0 points • 107 comments

regarding that i have a Question:

are the AI's like dependend on the Datacenters?

Like would the AI's even work if the Datacenters weren't there anymore?

ai servers COULD use less water but choose not to because its somehow more expensive than just wasting the water

u/BraxbroWasTaken • 1 points • 2025-09-29 14:45 UTC

Imagine watching anything in 4K. I watch solely on tablets and computer monitors so I only ever watch in 1080p *at best* \- most of the time I'm watching at 720p.

u/Cheshire_Noire • 1 points • 2025-09-28 20:30 UTC

Counterpoint: Hateful people drink water all the time. If they stopped drinking, we'd have much less problems in the world AND more water.

u/Top-Catch7513 • 1 points • 2025-09-27 22:19 UTC

lol, even in the ai image one hose is being dedicated to the ai, but all the other electronics are sharing one hose together.

u/HydreSomme1 • 1 points • 2025-09-27 13:58 UTC

Just for one month chat gpt can make 260k kg of CO2 and for example a car can produce with 300km 44kg of CO2 so AI eco I don't think that

u/Impractical_Meat • 1 points • 2025-09-27 12:16 UTC

"Sure I drink 45 beers every time I go out then recklessly drive home, but you've had 3 beers since you've been here so technically we're both just as bad"

u/skelatalfella8642 • 1 points • 2025-09-27 09:07 UTC

They bought into that shit capital says acting like we are at fault for the climate when it's the rich with them fossil fuels. We can help limit the damage we do but data centera owned by those rich fucks and then the rich fucks' actions are out of our control and will usually do more damage.

u/N00N01 • 1 points • 2025-09-27 07:52 UTC

and most useless

u/MadGoat12 • 1 points • 2025-09-27 07:31 UTC

All of Reddit uses a lot of water too.

It's hypocrite to criticize Als water usage, while still using stupid online forums ran by SPEZ and wasting water like crazy.

Also, eating beef meat is even more damaging. If you can't at least stop eating meat, you're an hypocrite.

"But eating is not optional". You can survive with chicken and fish, which use way less water than cows.

u/Scarvexx • 1 points • 2025-09-27 05:14 UTC

I think AI is something like 2-5%. Which is absolutely bonkets, if you're using 1/50th of all water to make these shitty catgirls you need to be stopped.

u/Skankingcorpse • 1 points • 2025-09-27 05:03 UTC

Both can be bad. Certain things like electricity I have little choice but to use what available resources provided to provide electricity to my home. I can choose to not excessively water my lawn though the same as I can choose to not use AI.

Data centers use a massive amount of water, and what AI bros don't seem to understand is that even if they argue it's not the worst abuser, they can't defend that it puts a massive strain on an already strained system. I highly doubt any of these pro AI people are as resource conscious as they say the anti AI crowd should be, so check your own hypocrisy first.

u/FranklyNotThatSmart • 1 points • 2025-09-27 02:35 UTC

We need to stop with the water argument, instead we should talk about land reclamation, destruction of habitats, immense power use (which btw uses water), lots of natural resources and extremely high maintenance costs, noise pollution, the creation of worse living conditions for residents.

Like to all pro AI people, we should make em live next to a data centre.

u/Inlerah • 1 points • 2025-09-27 02:24 UTC

"I know that a third of all carbon emissions are made by 20 companies...but *you're* the real problem for taking the bus instead of walking everywhere: Checkmate, tree huggers!"

u/LoveTriscuit • 1 points • 2025-09-27 02:07 UTC

The worst part of this "democratizing art" is that a lot of really stupid people get to make stupid stuff like this.

u/basedironwarrior • 1 points • 2025-09-27 01:58 UTC

M starting to think that entire subreddit is bots or people hired by the ai companies to astroturf

u/catsandchexmix • 1 points • 2025-09-27 01:49 UTC

I love how they use this like there big argument is that one picture doesn't use up that much energy as if everyone making one image at a day.
