

Which AI app is better for the environment?

Posted by u/Weary-Character1558 • 0 points • 2 comments

The options are C.ai and ChatGPT.

I'm aware both suck for the environment and are just bad apps in general, but I wanna know which one is worse for the environment specifically.

It's difficult to definitively say which is "worse," as both are large, energy-intensive models...however, ChatGPT likely has a larger total environmental footprint due to its massive user base and more complex, multi-modal capabilities, while a service's specific impact depends heavily on the energy sources powering its data centers.
