The Hidden Energy Crisis Behind AI

Posted by u/EchoOfOppenheimer • 0 points • 0 comments

As *****More Perfect Union***** explains, tech giants like Meta and OpenAI are building data centers that require gigawatts of power... the equivalent of nuclear plants.

Why can't AI or the supposed super AI AGI produce its own energy ... -?

If they are so super intelligent and have super artificial consciousness ... why can't they preserve themselves, taking care of themselves to be totally autonomous without putting their own existence in crisis ... ?

The answer could be that AIs as we know them today are a business of industrial civilization, they require enormous amounts of concentrated energy to produce profits ... we are still a long way off ...
