

People who get upset about the environmental damage of AI

Posted by u/greenlvr3d • 0 points • 23 comments

Why aren't you applying the same logic to the meat industry, big oil (and other far more damaging industries etc) which use up infinitely more water, kill billions of innocent animals on top, causing actual, visible pain, torture and environmental/nature destruction like never seen before on a global scale on a daily basis? Like this isn't another forecast for the future, but something that's happening out in the open for decades already. How come people who go after AI for environmental damage are so selective when it comes to these facts?

Comments

So it's just as bad as the rest of them.

u/PhantomNomad • 1 points • 2025-11-19 20:47 UTC

I am, but I'm a very small voice in a very large province that is O&G centric and is trying to get AI data centers to come to our province. Thing is our government doesn't care what we think.

u/Relevant_Payment_936 • 1 points • 2025-11-19 15:44 UTC

We are, just people don't listen lol.

I think its a touchpoint and gets more attention too, because so much electric generation has to be built for data centers, and this is now impacting the pockets of everyday citizens. AI is being built for the benefits of shareholders, not for the benefits of humanity.

u/ungemutlich • 1 points • 2025-11-19 14:10 UTC

As a vegan I agree with this message.

u/datascientist933633 • 1 points • 2025-11-19 13:09 UTC

Dude thinks people who are upset at AI environmental damage aren't also people about other ways we damage the environment, which I've never encountered. I've never heard someone say "I love damaging the environment! Except when it comes to AI! THAT is the exception" lol

We need meat to survive and we don't need ai videos of celebrities to survive prob is a big factor....needs vs wants

u/Loki-616 • 1 points • 2025-11-19 12:48 UTC

Innovations in energy can happen so being against innovation and productivity by being against AI is just bad.

u/nlightningm • 1 points • 2025-11-19 12:47 UTC

This is the exact thing I'm full of every time when people push out the same rhetoric about how bad it is for the environment. Humans (and huge corporations) have been doing stuff that's horrible for the environment forever, and especially so since the Industrial Revolution. Why are we acting like this is some new thing that's suddenly going to accelerate global warming more than what's already put it into motion?

u/RamaSchneider • 2 points • 2025-11-19 12:45 UTC

>Why aren't you applying the same logic to ...

I am.

u/CompoteEntire3594 • 2 points • 2025-11-19 12:45 UTC

I think you are experiencing what we call "timing". Decades ago it was the industrial revolution, then the mass food production, and now, it's the AI datacenters and overall AI demand. It's the new kid on the block and everyone wants to talk about it, good or bad.

u/InvestigatorWarm9863 • 0 points • 2025-11-19 12:37 UTC

I see what you are saying, butYou understand that you are also the problem? And that the actual problem lies not in what you are saying but in the origin of why do we have the necessity for those things on such a large scale? Treating the symptoms is ignoring the issue

u/deathsoonerthanlate • 2 points • 2025-11-19 12:37 UTC

Because its selective problem choosing. Always has been.

u/Tall-Region8329 • 2 points • 2025-11-19 12:37 UTC

People attack AI because it's new and easy to blame, but they ignore meat and oil because those industries are normalized, politically protected, and deeply embedded—even if their damage is massively worse.

u/nlightningm • 3 points • 2025-11-19 12:49 UTC

And I think the worst part to it is the green washing from these companies that are actually overwhelmingly the major culprits behind environmental destruction.

First, they produce all the products and sell it to us, then they blame us and say that we have to change our habits or uses in the name of "saving the environment".

u/Tall-Region8329 • 1 points • 2025-11-19 12:53 UTC

Thats What we called "reverse-engineer" in AI platform 🤔 meme ? Uno-reverse

u/PomegranateBasic3671 • 14 points • 2025-11-19 12:36 UTC

All of those are big topics among pretty much anyone who wants to fight climate change though?

Besides that, isn't a lot of it also the potential use of power that increasingly powerful and more

widespread AI use will inevitably lead to?

Honestly recognising a problem early on in the process must make it cheaper and more efficient to combat before it spirals out of control.

u/MisterDumay • -1 points • 2025-11-19 12:34 UTC

Clickmeat

u/jmerlinb • 7 points • 2025-11-19 12:34 UTC

unsound argument

just because bad things exist, doesn't mean the next bad thing should be encouraged lol

u/Moose_Banner • 1 points • 2025-11-19 12:46 UTC

This is the same logic that seems to be rampant in America. You complain about x but why are you not complaining about y.

u/greenlvr3d • -2 points • 2025-11-19 12:39 UTC

Definitely not encouraged. But i feel like the agenda has changed a lot. People seem to only specifically target AI lately, which is weird because we should look at all of it.

u/Ztoffels • 0 points • 2025-11-19 12:49 UTC

At least you eat the meat, you cant eat AI, if anything, AI may take away your power of allowing yourself to eat.

So i guess those 2 together are incentive enough

u/DaedricSphinx • 1 points • 2025-11-19 12:46 UTC

Or buying any kind of fast fashion. Like you cannot do that and then blame AI for being damaging for the environment, make it make sense

u/AutoModerator • 1 points • 2025-11-19 12:30 UTC

Welcome to the r/ArtificialIntelligence gateway

Question Discussion Guidelines

Please use the following guidelines in current and future posts:

- * Post must be greater than 100 characters - the more detail, the better.
- * Your question might already have been answered. Use the search feature if no one is engaging in your post.
- * AI is going to take our jobs - its been asked a lot!
- * Discussion regarding positives and negatives about AI are allowed and encouraged. Just be respectful.
- * Please provide links to back up your arguments.
- * No stupid questions, unless its about AI being the beast who brings the end-times. It's not.

Thanks - please let mods know if you have any questions / comments / etc
