

Why are so many people using ai even though it's awful for the environment and our society?

Posted by u/Temporary-Winner5778 • 0 points • 3 comments

I feel everywhere I look people use chat gpt or other AIs as a friend or having it constantly generate images why?? When I talk to people they do not care about the environmental impact that ai has ! It blows my mind . It's truly hurt the way I view humanity as long as it's convenient and easy people will do it even if it's hurting someone else. If you can't see it who cares right ? I'm not saying ai can't have good uses but I feel it's used have gotta put of control and I hate it.

I think there are several reasons. The most important is that the average person who uses AI like ChatGPT or whatever has no idea of the impacts that it has on the environment. They just look at it as a new version of Google.

Then there are the people who know, but who think to themselves: "I'm only a single user, and millions of people are using this. I would fall behind if I am the only person not to use it," and then feel that it's okay for them to engage.

Thanks for your submission /u/Temporary-Winner5778, but it has been removed for the following reason:

****Rule 2: Please try to use the search function before posting anything.****

Thanks for posting, but this question happens to be one that has been asked and answered here often before - sometimes in the same day! That can get frustrating for our dedicated users who like to answer questions. Or maybe you're just asking the same question too often - why not take a break for a while?

Sometimes questions that come up too often get put in our [Most Frequently Asked Questions list] (<https://www.reddit.com/r/NoStupidQuestions/wiki/index/faq!>). Other times, it may just be that we're getting a flood of questions about a topic (especially when something is in the news). Or maybe you

keep asking the same question again and again - something that annoys our users here. Please don't do that! Next time, please try searching for your question first before asking. Thanks!
