AI Bros say "AI art is cheap and accesible" and "is not wasting water because i got a local machine with comfy UI"

Posted by u/Competitive-Main1539 • • 0 points • 2 comments

Comfy UI literally requires NVidia Graphics

A lot of them are PC masterace bro that have water cooling, and all of them combine are using billions of gallons of water that are removed from the environment and end up polluted because they never clean their basement. And there is trace of 5 year old rotten cherrios in the water.
