

The Government should focus on water, electricity and health for AI.

Posted by u/Arivie • 0 points • 18 comments

The government currently is funding massive subsidizing of AI companies and allowing excessive borrowing. Instead of subsidizing the government should focus on massive hundreds of billions towards renewing the entire water supply of the nation. Rivers cleaned and expanded. Deep lakes built across the nation. Nuclear power for the tech companies data centers funded by the tech companies. If the government focused on massive water infrastructure, no community power for the data centers instead nuclear power within and regulations on pollution of crops and water ways we have a bright future. Stop subsidizing. Start expanding the clean water supply. Build the nuclear power plants. Protect the people with a total rebuild of piping in America. Make the data centers arriving not disaster but renewal.

“Renewing the entire water supply of the nation” shows you are not a serious thinker. Your heart is in the right place, but a rebuilding of “piping in America” is nonsense.

“Deep lakes built across the nation” means you have watched too much TV.

u/Arivie • 1 points • 2025-12-26 02:17 UTC

Other nations build deep lakes. Piping does need replaced. But it's fine, I respect your opinion.

u/Domugraphic • 1 points • 2025-12-23 11:40 UTC

let mw guess, youre in the USA? love how you folk talk about your country as if it's the only one

u/Arivie • 1 points • 2025-12-23 14:34 UTC

Yes sir. Hoosier.

u/DeliciousArcher8704 • 1 points • 2025-12-23 14:11 UTC

You wouldn't have to guess if you read the post, it says america in the body

u/GrowFreeFood • 1 points • 2025-12-23 06:11 UTC

Buy some lobbyists

u/Arivie • 1 points • 2025-12-23 14:37 UTC

Me and my \$1 donation

u/Icy-Stock-5838 • 2 points • 2025-12-23 05:11 UTC

We gonna exhaust our water and air supply so we can make memes and avoid writing essays the old way ??

PLEASE let's get our priorities straight.. AI is fine for scientific research, but NO WAY for novelty gimmick tasks..

Prices should be raised to reflect the impact on our resources and environment.

One thing missing here is basic governance capacity. Big infrastructure projects like water systems and power grids take decades of steady planning and maintenance, not just money. AI just exposes how weak that long term thinking already is. If governments cannot manage pipes and grids properly, throwing subsidies at AI companies or even infrastructure tied to AI will not fix the root problem. The priority should be rebuilding institutions that can plan and execute at scale over many years.

u/Exotic-Dig9286 • 2 points • 2025-12-23 00:03 UTC

Makes sense tbh, we're throwing money at AI companies while Flint still doesn't have clean water and the power grid is held together with duct tape and prayers

u/Arivie • 1 points • 2025-12-23 14:36 UTC

Exactly.

u/Bodine12 • 2 points • 2025-12-22 18:03 UTC

Why not do that regardless of AI? This is just a backdoor subsidy for AI to force taxpayers to build out a huge chunk of the infrastructure so AI companies don't have to.

Without AI, much of what you're proposing isn't needed. The real solution to these problems would be to reduce our energy footprint overall, not prep the infrastructure so AI can quadruple our energy use.

u/Arivie • 1 points • 2025-12-23 14:36 UTC

We have leverage is the argument. Corporations want something from us and we want the water infrastructure needed for decades. It's a trade.

u/Bodine12 • 1 points • 2025-12-23 15:13 UTC

Who is "we" here? If "we" are the people who elect our representatives, then "we" can build out the water infrastructure anytime we want to, and either way in your scenario, "we" are paying for it, not the AI companies. So it's not a trade at all. It's a freebie for the AI companies.

u/Arivie • 1 points • 2025-12-23 15:14 UTC

The local communities have veto power. We have leverage outside of Washington DC politics for construction generally.

u/Bodine12 • 1 points • 2025-12-23 15:19 UTC

But the local communities, which own and maintain the water infrastructure, don't have the money, otherwise they would have made these improvements in the first place. My water bill goes up every time we have a new capital improvement project. So are you suggesting that AI companies are going to step in and pay local water utilities to upgrade their infrastructure?

u/Arivie • 1 points • 2025-12-24 10:12 UTC

I'm suggesting the federal government pays for it and the agreement is if the feds will pay for the water infrastructure upgrade and revitalization nationwide. This would get rid of a major part of the resistance of new data centers which allows them to get created. It's an indirect trade.

u/Bodine12 • 1 points • 2025-12-24 14:11 UTC

We just had the \$1.2 trillion Infrastructure and Jobs Act that did a lot of this under Biden. And Biden got voted out. This sort of large scale infrastructure investment

won't happen for another generation, especially not to benefit AI, which the majority of people hate.

And even if you could get the water investments, it wouldn't get rid of even a fraction of the resistance to AI data centers, because most of it is due to exploding electricity prices in electrical grids that host data centers, not the water.

What we should do instead is regulate AI out of existence until it can work within our existing infrastructure footprint. It's just not ready for prime time yet, due to its bad energy to value-produced ratio.

I
talked
about
both
electric
and
water.

u/Normal_Pace7374 • 1 points • 2025-12-22 16:18 UTC

Government doesn't care about people. It cares about quick financial gains for it lobbyists.

Humanity doesn't even factor into the equation.

u/Crazy_Donkies • 2 points • 2025-12-22 16:20 UTC

Project Genesis is 100% about privatizing the future economic value of AI. It's like privatizing the freeway system and the economic progress it created.

Welcome to the r/ArtificialIntelligence gateway

Question Discussion Guidelines

Please use the following guidelines in current and future posts:

- * Post must be greater than 100 characters - the more detail, the better.
- * Your question might already have been answered. Use the search feature if no one is engaging in your post.
- * AI is going to take our jobs - its been asked a lot!
- * Discussion regarding positives and negatives about AI are allowed and encouraged. Just be respectful.

* Please provide links to back up your arguments.

* No stupid questions, unless its about AI being the beast who brings the end-times. It's not.

Thanks - please let mods know if you have any questions / comments / etc

I am a bot, and this action was performed automatically. Please [contact the moderators of this subreddit] (/message/compose/?to=/r/ArtificialIntelligence) if you have any questions or concerns.
