Environment and ai hype

Posted by u/PoteznyPolskiRedd • • 0 points • 0 comments

I was really pro AI person and used to laugh at people who said that it's bad etc

However, recently, I've came across studies how much generative ai using contributes to CO2 emissions and water usage (because of cooling)

So, from now I decide to use AI as little as possible, and definitely don't use it for generating content
