

I'm tired of seeing people saying "don't use AI because it hurts the environment," so I made this graph.

Individual users don't do jack squat to the environment. If you want a bad guy, go after megacorporations and their fleets of efficiency agents. They **want** you to blame literally anyone else while **they** destroy the earth.

Comments

Totally get the frustration here. Most of these debates collapse because people lump individual usage, training runs, and corporate scale into one bucket, when they are very different problems. The graph is useful as a framing tool, but the real issue is transparency and context around where the energy actually goes and why. When I try to make sense of claims like this, I usually cross check sources and look at model efficiency rather than raw numbers.

Tools like AlchemistAiOfficial are helpful for that kind of sanity checking since you can see citations and compare impact instead of arguing off vibes. It shifts the conversation from blame to actual accountability.

not all people generate images locally

u/cereal-Bill • 1 points • 2026-01-14 06:10 UTC

You didn't prove the argument wrong you only pointed out the main point of concern that even us pros should be worried about

I'm not bald, but I hang out in the bald subreddit for the laughs and the antis are ranting about ai images like the world is ending. Really ruining my experience.

u/carnyzze • 3 points • 2026-01-13 09:51 UTC

It's easier for them to bully regular ass people asking chatgpt to turn them into a spongebob character, they won't put the same effort towards a business like Microsoft lol

u/Rockfinder37 • 1 points • 2026-01-13 06:19 UTC

You made this graph ? From where did you get your data ?

u/Verdux_Xudrev • 2 points • 2026-01-13 06:01 UTC

It's called "slacktivism" and the internet is the best at it.

"I can't change big thing, let me whine online about someone doing big thing but way smaller."

u/Any_Camp_5304 • 2 points • 2026-01-13 05:01 UTC

100% thank you for taking the time to present facts. Your side of the debate is valid. I've been wanting to say this for months but nobody cares about words. The numbers are there and as I expected.

u/Crazy_Dubs_Cartoons • 1 points • 2026-01-13 04:35 UTC

Forrest Gump is right

u/cool_fox • 8 points • 2026-01-13 03:59 UTC

It would be interesting to have a tool that parses a user's post/comment history, determines roughly when they got vocal about anti-AI (almost all of them 2024), whether or not they've ever expressed concern about the environment in other ways (golf courses, farming, data centers for other uses), then assigns an honesty score to them.

Scores would range from (totally arbitrary) 0% they're total hypocrites and actively harm the environment in other ways, to 100% you really are an echo warrior.

Maybe also report when they first used the word "slop" and if they ever once used it outside an anti AI context, if not then call them out for that and label them hive mind followers.

I might make this later this week actually

u/ASingleShadow • -5 points • 2026-01-13 13:17 UTC

Do you not see how ridiculous that sounds

u/cool_fox • 4 points • 2026-01-13 14:02 UTC

It's not that serious

u/angrywoodensoldiers • 6 points • 2026-01-13 04:28 UTC

do it do it do it

u/mah29001 • 1 points • 2026-01-13 03:00 UTC

Why does they blame China? It has the most AI especially with its social credit system.

u/Shot-Address-9952 • 4 points • 2026-01-13 02:27 UTC

Oh, fun! Now do how much any type of logistics branch (sea, air, rail, and auto) puts out per day. AI environmental impact is a silly comparison when the United States' auto fleet (approximately 240 million cars) accounts for around a quarter of GHG emissions.

u/witshadows • 2 points • 2026-01-13 02:00 UTC

Golf courses currently use just over 5x the water that data centers do. Data centers currently being built and existing centers combined, projected out to 2030, still will not be under golf course use. Plus we must consider that golf courses have used this much water, chemically treated nonetheless, for decades.

So ban golf course water and protest their development. It's the only logical thing to do, right?

u/Whilpin • 3 points • 2026-01-13 03:10 UTC

but where will the poor, unfortunate rich people go to relax? Epstein's already gone
