

Environmental impact of AI: what should we measure, and what actually works?

Posted by u/Asleep-Term-4379 • 0 points • 0 comments

Hey all,

I'm trying to map how people think about the environmental footprint of everyday AI use, beyond vague claims, and actually take action. What matters most to you when you think "AI sustainability"? Would love your help on this survey (takes ~5-7 mins), and I need 100 participants! Thanksss :)

yeah, tho finding those communities and getting honest feedback can be tough. maybe local environmental groups could help connect you?

More Perfect Union on youtube has done some reporting on these sort of things, maybe you could reach out to them?
