

It n the time span that I recycled roughly a litre of water I made this un-tanned trump in ibis paint because I am better than ai and SO ARE YOU

Idk if its sunday in America rn so sorry ig?? But yeah. Anyway, side rant. My dad is an incredible artist yet uses ai for EVERYTHING including image generating. A lot. I get so PISSED because he cares incredibly deeply for nature, and can draw what he wants to generate flawlessly, but still chooses to further harm the environment the wat he does. Oh and, he only uses meta. I'm sick of him relying on it for everything. He gets too zonkled to even write his poetry (which is like a passion for him) and asks ai to. Anyway theres my side rant lol.

And yes, my dad is a gay poet who happens to be an artist, ai user and in active psychosis.

This reminds me of a dream i had where trump had an identical twin called Ronald and he was completely different to him ideology. Wanting to give ppl more rights, help the environment, tax the rich, and he ran for president when trump got out of office and won

Did he win because MAGAs thought he was Trump?
