HEAR ME OUT: AI isn't nearly as bad for the environment as we say it is

Posted by u/dizzyflamingo6 • 0 points • 21 comments

guys cus why do we act like AI's gonna end the world's water supply.

IT ACCOUNTS FOR 0.2% OF ALL FRESHWATER USE

like genuinely, making a can of soda uses more freshwater than multiple years of AI for the average user :)

i saw a video genuinely blaming AI for global warming, all like "polar bears or AI?"

anyways lwk just a crashout, sorry for bad formatting im on mobile and ai misinformation is obviously still a major issue

wb electricity

u/dizzyflamingo6 • 1 points • 2026-03-18 04:14 UTC

electricity use? still less than 1% worldwide ofc and it's an unlimited resource, also it lwk is a tool for solar panel production and improvements

u/Able_Inspector_2580 • 0 points • 2026-03-18 04:22 UTC

source???

u/dizzyflamingo6 • 1 points • 2026-03-18 04:28 UTC

<https://joannenova.com.au/2025/05/new-ai-data-centers-will-use-the-same-electricity-as-2-million-homes/>

data centers overall are around 1.5%, educated guess, i would put some articles into anara but im lwk too lazy

u/Able_Inspector_2580 • 1 points • 2026-03-18 04:34 UTC

u/dizzyflamingo6 • 2 points • 2026-03-18 04:40 UTC

no worldwide numbers, it likes to compare it with small populated countries rather than factory or farming heavy countries that generate the most usage but i see your point

u/SimpleCandle5158 • 1 points • 2026-03-18 03:58 UTC

reddit just hates AI for whatever reason. It's an incredible tool but most people on here don't view it as such.

u/Skyhigh905 • 2 points • 2026-03-18 07:24 UTC

I think the reason is because it's being forced onto us whether we like it or not, it decreases the quality of products, because it's being used to scam people and generate child porn, has skyrocketed the price of hardware, and because it puts artists out of jobs and allows people to pretend to be artists.

Additionally, while AI is obviously not all bad, and in medical fields it can do wonders, as it stands, chatbots and image generation (The stuff most people refer to when they mean AI) don't really solve a real issue we have in the way that say, the car or the antibiotic do.

u/Able_Inspector_2580 • 6 points • 2026-03-18 04:09 UTC

i mean ur brains a pretty good tool too

u/AugustHate • 1 points • 2026-03-18 03:58 UTC

what about carbon

u/dizzyflamingo6 • 1 points • 2026-03-18 04:01 UTC

still only as bad as most new inventions, manufacturing day to day things still use way more

u/AugustHate • 1 points • 2026-03-18 04:05 UTC

Passed nyc's carbon emissions while in it's infancy. This is not manufacturing anything physical.

u/dizzyflamingo6 • 1 points • 2026-03-18 04:09 UTC

nyc is an urban area, not made for manufacturing, and i'm putting it in perspective worldwide, as AI is a worldwide tool

u/AugustHate • 2 points • 2026-03-18 04:14 UTC

I'm saying AI outdid nyc in terms of carbon emissions bcoz NYC is polluted as hell and all ai does so far is make charlie kirk porn

u/dizzyflamingo6 • 1 points • 2026-03-18 04:20 UTC

lollllll, i get that but nyc pollution is just an issue cus it's populated so it affects a lot of ppl

u/Long_Replacement_223 • 5 points • 2026-03-18 03:54 UTC

Boys account for over half of the internet's bandwidth. Ai has skyrocketed PC parts and subscriptions for everything involving all that. Ai has not only been lying to us and has been biased all this time . Ai isn't for us, we are just data it uses to learn

u/dizzyflamingo6 • -3 points • 2026-03-18 04:05 UTC

i can understand your point with tech parts, but in simple supply and demand, AI is raising demand, not lowering supply, and btw, i did shortly address the bias issue in my post

u/Skyhigh905 • 1 points • 2026-03-18 07:17 UTC

That's just factually wrong, AI is decreasing supply for things like RAM which is why there's a shortage going on. The wafers used to make consumer grade RAM can't be used for both consumer and server ram simultaneously, so when it's used for AI data centres instead of standard DDR sticks we end up with less supply.

u/Long_Replacement_223 • 2 points • 2026-03-18 04:10 UTC

Yikes! I messed up badly. I typoed and meant to put bots. 🤦

u/dizzyflamingo6 • 1 points • 2026-03-18 04:29 UTC

ohhh i was confused lol
