

People complaining about AI data centers using a lot of water are hypocritical and don't even know why

Posted by u/fromaster97 • 0 points • 0 comments

Cooling off equipment with water is not something new and is not something only AI companies do. If you watch any streaming platforms and use social media constantly you are contributing to the issue more than AI companies are. Watching a 2 hour movie on Netflix wastes more water than using AI for basic queries throughout the day

> You are contributing to the issue more than AI companies are

That's an objective claim: that streaming a show all day or using social media all day requires more energy and uses more water than using gen AI all day. Do you have those numbers? I am honestly curious.

Actually Google it

u/Makuta_Servaela • 1 points • 2026-03-26 20:15 UTC

I won't be able to know what specific source you found that told you this, unless you share it.

u/fromaster97 • 0 points • 2026-03-26 20:22 UTC

Google does Netflix consumes less than more water than ai. You will have find many sources

u/Makuta_Servaela • 1 points • 2026-03-26 20:39 UTC

Just did, didn't find any sources that agreed with you.

u/fromaster97 • 0 points • 2026-03-26 20:44 UTC

lol I'm losing brain cells talking with you to the point where I don't even know if you are joking or not. Have a good one

u/Mike_Hav • 1 points • 2026-03-26 17:35 UTC

Its not only that it wastes water. These data centers are going places that have water issues already. Where i am in Phoenix AZ they are opening up a lot of data centers and we have water security issues out here. Lake Mead is very low and we are getting less rainfall to replenish what we are using, sonthis is only going to make it worse. They need to go places that dont have water issues like Michigan or the North East or Pacific NorthWest.

u/pseudonym7083 • 1 points • 2026-03-26 17:31 UTC

That water is contaminated as soon as it's used in data centers. That's the problem.

u/fromaster97 • 1 points • 2026-03-26 17:37 UTC

It's definitely an issue. It's just funny people put all the blame on ai companies while they are also contributing to the problem

u/multus85 • 1 points • 2026-03-26 17:28 UTC

Water also isn't used up. It's just used. It's still there after.
