

Meta's new 10 billion dollar data center uses about the same water as a single golf course.

Posted by u/Dry_Incident6424 • • 0 points • 80 comments

The data centers use tons of war meme is comically absurd at this point. Per investment dollar, AI probably uses less water than just about anything else.

There are 16,000 golf courses in the US. We'd need an AI industry build out larger than the entire current global economy to match the water usage of just US golf courses.

"Per investment dollar"

That is exactly the sort of intellectual dishonesty I expect from AI supporters.

u/Dry_Incident6424 • 1 points • 2026-03-30 13:13 UTC

How many 10 billion dollar data centers can they actually reasonable build, so whats the upper limit of water consumption of data centers of this type?

Literally no one can provide a good answer to this when I ask it. Just downvotes and huffs off.

Dead thread but answer me this:

Didnt they stop Metaverse? What is this "new" datacenter doing?

u/Dry_Incident6424 • 1 points • 2026-03-30 03:40 UTC

Meta used to have one of the best AI programs, then it turbo fell off. This data center is them trying to get back in the game and produce a genuine frontier model again.

u/SipDhit69 • 1 points • 2026-03-30 03:40 UTC

Cant use the old architecture from Metaverse?

u/Dry_Incident6424 • 1 points • 2026-03-30 03:51 UTC

IDK what physical infrastructure they were using to run their VRgame, but it wouldn't have been enough to actually do serious model training.

u/SipDhit69 • 1 points • 2026-03-30 05:21 UTC

One would hope this gets repurposed properly somehow. All I see is failed billions, then moving on to dumping more billions into something else

u/feefybart • 0 points • 2026-03-29 16:11 UTC

burn it all down.

its still too much waste for pointless bullshit.

we dont need ai

u/jnthhk • 0 points • 2026-03-29 08:32 UTC

You missed the link to the evidence

u/jay-ff • 1 points • 2026-03-29 00:52 UTC

Now tell them about the electrical power.
