

[Request] Ai vs toilet flush: which one consumes more water?

Posted by u/Top-Visit7891 • 0 points • 2 comments

This is a question. I don't know the answer, but maybe some of you do, and I would love to know more about this topic. I heard that 1 prompt in Gemini consumes 0.26 milliliters of water on average (though it's higher for ChatGPT), and a toilet flush consumes 6 liters. So, do you really need to generate 23,000 Gemini text prompts to consume the same amount of water as one toilet flush? Also, the water used in both cases is of similar quality. Is that really true?

###General Discussion Thread

This is a [Request] post. If you would like to submit a comment that does not either attempt to answer the question, ask for clarification, or explain why it would be infeasible to answer, you *must* post your comment as a reply to this one. Top level (directly replying to the OP) comments that do not do one of those things will be removed.
