Why aren't environmental activists interfering with the construction of an AI data center?

Posted by u/Other-Ad4132 • 0 points • 31 comments

Why aren't activists holding rallies against AI? It's become clear that servers are causing colossal environmental damage. Why aren't there headlines about activists chaining themselves to work equipment or blocking the road leading to a construction site? Why aren't there headlines about EMP bombs or anything like that?

Because servers don't cause "colossal environmental damage" when compared to a lot of other human activities.

B/c outside of the ignorant on social media, the data centers are far from the biggest issue.

Data centers are here to stay. NOTHING will change that.
