Student research into the AI sustainability

Posted by u/johndeeror172 • • 0 points • 0 comments

Hello everyone, I am an electrical engineer student at a German university conducting a research about AI and sustainability as a part of the "Design thinking" Module of my studies, I would like to take a few minutes of your time to gather info about your experiences with AI and how it impacts your life , please keep in mind that this questionair is for research purposes, and your usernames will not be appearing in the final research paper.

The target audience is everyone and experts in economics/sociology/AI

1- are you an expert in this field? If yes please indicate your Credentials without sharing names

2- is AI directly impacting your life right now? How?

3- How does AI influence your social life, and in what ways do you notice that it also affects other people socially?

4-Do you think AI is currently helping or harming the environment? And why?

5-How do you think AI would shape the near future?

6-Do you think regulation could mitigate the negative impact of AI? How so?

7-Closing statement (optional)

Thank you very much for being part of this research !
