

# Is c.ai bad for the environment?

Posted by u/User\_47267 • 0 points • 6 comments

I know chat gpt is quite harmful and I've never used it for that reason but when I find myself in writers block or bored at night I occasionally use c.ai and was wondering if anyone knew I'd it also was harmful? I hope someone can answer this!

I don't like defending ai...but...10 messages sent to cai emits as much carbon as one person using TikTok for 10 minutes

Even if chatgpt doesn't inherently use a lot of energy per search of an individual, imagine how much energy it will be using when millions of people send a bunch of messages every single minute? Surely that will eventually make the systems overheat and be wanky

I trust this...

u/gmftdude • 1 points • 2025-06-16 02:50 UTC

Imagine not using something because it's harmful to the environment, seems a bit extreme considering most things are. Phones for example produce 146 million tons of carbon dioxide emissions according to one study, are you gonna throw away your phone now?

Well, this is definitely a combination of words to form sentences. Don't know what else it is, though

Yes. But since I won't have children, so I made compensation to the Carbon dioxide emissions in some way.

**u/Bruiserzinha** • 4 points • 2025-06-16 00:43 UTC

It is. It's the same base of all LLM, huge farm servers using up water to cool those rtx

**u/User\_47267** • 3 points • 2025-06-16 01:10 UTC

Oh awe man ill definitely be sure to limit my use of it then!
